PROFESSIONAL SUMMARY

Cybersecurity Engineer with 5+ years of hands-on experience spanning offensive security (penetration testing, red teaming, adversary simulation), defensive operations (DFIR, threat hunting, SIEM/SOC engineering), and cloud security governance (ISO 27001, NIST, PCI-DSS). Proven track record of leading red team engagements, performing forensic and malware analysis in corporate infrastructure, and conducting vulnerability assessments across hybrid cloud environments (AWS, Azure, Alibaba Cloud). Skilled in building and tuning SIEM detection pipelines (Microsoft Sentinel, Splunk, Wazuh) and cloud security auditing using open-source tooling including Pacu, ScoutSuite, and Prowler. Experienced in automating security workflows with Python, Bash, and PowerShell. Adept at translating complex technical findings into executive-ready risk assessments with CVSS scoring and actionable remediation roadmaps.

PROFESSIONAL EXPERIENCE

DigiPlus Interactive Corp

Apr 2024 – Present

System Security Engineer — Manila, Philippines

- Lead offensive security assessments across web applications, APIs, servers, and network infrastructure, identifying and exploiting high-impact business logic and authentication vulnerabilities.
- Conduct red team simulations including privilege escalation, lateral movement, and data exfiltration aligned with real-world attacker behavior and the MITRE ATT&CK framework.
- Execute Digital Forensics and Incident Response (DFIR) investigations using CrowdStrike, Microsoft Defender, and Trellix, including log correlation, evidence preservation, and root cause analysis.
- Design and optimize SIEM detection rules and dashboards in Microsoft Sentinel, Splunk, and Wazuh as part of purple-team exercises with the Blue Team.
- Develop and maintain security runbooks for event classification, prioritization, and incident response workflows, reducing mean time to respond.
- Conduct continuous dark web monitoring to identify data leaks, compromised credentials, and emerging threats.
- Perform security monitoring and perimeter assessments using Sangfor SASE across distributed cloud assets.

Dynamic Strategy Solutions Experts Corp

Jun 2023 – Mar 2024

Advanced Cybersecurity Engineer — Manila, Philippines

- Monitored and responded to security alerts within Alibaba Cloud security services, minimizing operational impact across enterprise infrastructure.
- Managed endpoint protection and security control implementations using Trellix EDR and Fasoo DRM to ensure data integrity and tenant isolation.
- Conducted malware analysis, threat investigations, and forensic log analysis to support compliance audits and internal security reviews.
- Monitored network threats using SANGFOR CC security solutions and performed incident triage across high-volume client environments.

Enterprise InfoSec Consultants (EIC)

Jul 2021 – May 2023

Cybersecurity Engineer — Dhaka, Bangladesh

- Delivered black-box, grey-box, and white-box penetration testing engagements for banks and financial institutions, including IFIC Bank, United Commercial Bank, Uttara Bank, Lanka Bangla Finance, Meghna Bank, and Pathao.
- Executed network, web application, API, and Active Directory security testing including AD enumeration, Kerberoasting, and privilege escalation.
- Produced detailed technical reports and executive summaries aligned with OWASP ASVS and PCI-DSS, applying CVSS-based risk prioritization to drive remediation.
- Conducted dark web analysis and malware analysis to monitor clients' online exposure and mitigate cybercriminal threats.
- Delivered cybersecurity awareness training and technical guidance to client teams, improving organizational security culture.

PaidTask

Jan 2020 – Dec 2021

Campus Ambassador & Vulnerability Assessor — Dhaka, Bangladesh

- Conducted vulnerability assessments on PaidTask's web platform, identifying and reporting security weaknesses.
- Developed and maintained web applications using HTML, CSS, PHP, and Bootstrap.
- Promoted cybersecurity awareness and engaged with university communities as a Campus Ambassador.

EDUCATION

Daffodil International University	2019 – 2023
--	-------------

B.Sc. in Software Engineering, Major in Cybersecurity — Dhaka, Bangladesh

- CGPA: 3.59 / 4.00

Al-Amin Academy School & College	2015 – 2018
---	-------------

Higher Secondary Certificate (HSC), Science — GPA: 3.25 / 5.00

Al-Amin Academy School & College	2014 – 2015
---	-------------

Secondary School Certificate (SSC), Science — GPA: 4.81 / 5.00

CERTIFICATIONS

-
- ISO/IEC 27001 Lead Auditor (LA) — Sustainable Management System Inc. (Feb 2025)
 - Certified Ethical Hacker (CEH) — EC-Council (Apr 2021)
 - Certified Vulnerability Assessor (CVA) — Mile2 (Apr 2021)

TECHNICAL SKILLS

-
- Offensive Security & Penetration Testing: Burp Suite Pro, Metasploit, Nmap, BloodHound, Sliver, Covenant, Cobalt Strike, Impacket, CrackMapExec, NetExec, Hashcat, John the Ripper, Hydra, SQLmap, DirBuster, Gobuster, FFuF, Nuclei, Semgrep, OWASP ZAP, Wireshark, Nessus, OpenVAS, Nikto, WhatWeb, WPScan, Responder, Mimikatz, Evil-WinRM, Chisel, Ligolo-ng
 - Cloud Security & Auditing: Pacu (AWS exploitation), ScoutSuite (multi-cloud auditing), Prowler (AWS security assessment), CloudSploit, CloudMapper, AWS CLI, Azure CLI, AWS (EC2, S3, IAM, GuardDuty, CloudTrail, Config, Security Hub), Azure (Sentinel, Defender Suite, MCAS, Key Vault), Alibaba Cloud Security Center
 - Defensive Security & DFIR: Microsoft Sentinel, Splunk, Wazuh, CrowdStrike Falcon, Microsoft Defender XDR, Trellix, ELK Stack, OSQuery, Sysmon, Velociraptor, KAPE, Autopsy, Volatility, Any.Run, Joe Sandbox, Cuckoo Sandbox, VirusTotal, FireEye HX, YARA, Sigma
 - Network Security & SASE: Sangfor SASE, Sangfor CC, pfSense, iptables, WAF (ModSecurity, Cloudflare), VPN (OpenVPN, WireGuard), IDS/IPS (Snort, Suricata), Zeek (Bro)
 - Languages & Scripting: Python (automation, exploits, API integration, tooling), Bash, PowerShell, PHP, Java, C, HTML/CSS, JavaScript, Dart, YAML, Kusto Query Language (KQL)
 - Frameworks & Standards: MITRE ATT&CK, OWASP Top 10, OWASP ASVS, NIST 800-53, PCI-DSS, ISO/IEC 27001, CIS Benchmarks, CVSS v3.1, CSA CCM, Cyber Kill Chain
 - DevSecOps & Other: Docker, Git, CI/CD Security (GitHub Actions, Jenkins), Jira Service Management, Fasoo DRM, API Security Testing, Dark Web Intelligence (Tor, Ahmia, OnionScan), OSINT (theHarvester, SpiderFoot, Maltego, Shodan, Recon-ng)

SELECTED PROJECTS

-
- DarkWebIntel — Dark web crawler and threat intelligence collection platform with automated IOC extraction (Python, Scrapy, Tor, Elasticsearch)
 - VA-Master-Tool — Automated vulnerability assessment framework integrating Nmap, Nuclei, and custom checks with HTML/PDF reporting (Python, Django)
 - Mac-Forensic — macOS forensic evidence collection and investigation toolkit supporting unified logs, plist parsing, and artifact timeline generation (Python)
 - CI/CD Stealth Fuzzer — Security fuzzing tool and custom Nuclei templates for detecting misconfigurations in CI/CD pipelines (Python, YAML, GitHub Actions)
 - S3 Operations Tool — Automated AWS S3 bucket auditing, permission enumeration, and security misconfiguration detection (Python, Boto3)

- bdctf — Capture-The-Flag competition platform with dynamic challenge deployment and real-time scoring (Dart, Docker)
- Vulnerability Management System (VMS) — Centralized vulnerability tracking, CVSS scoring, and remediation workflow management platform (PHP, JavaScript, MySQL)
- NetScan & snmaps — Network discovery and Nmap automation suite with service fingerprinting and report generation (Shell, Python)

ACHIEVEMENTS & TRAINING

- Top 13 — National Cyber Drill 2022, BGD e-GOV CIRT (competing against national cybersecurity professionals)
- Conducted external penetration testing engagements across 8+ financial institutions
- Led 20+ DFIR investigations across cloud and on-premise environments
- Created 25+ custom SIEM detection rules, reducing threat detection gaps across multiple enterprises
- Delivered talks and workshops on Windows Forensics and API Hacking
- Attacking & Defending AWS and Azure — TryHackMe (2025)
- Windows Forensics — Cyber Security Center, DIU (2021)
- Burp Suite: In-Depth Survival Guide — Udemy (2022)
- Intro to Bug Bounty Hunting & Web Application Hacking — Udemy (2022)
- OSINT: Content Discovery — Udemy (2022)

LANGUAGES

- Bangla (Native) | English (Fluent) | Hindi (Conversational)
